

Green and Gracious Builder Scheme (GGBS)

BCAs Green and Gracious Builder Scheme (GGBS) and Green and Gracious Builder Award aim to raise the environmental consciousness and professionalism of builders.

The award acts as a benchmark of a builder's corporate social responsibility to the environment and the general public.

Why it is needed?

- *The award acts as a benchmark of a builder's corporate social responsibility to the environment and the general public.*
- *The GGBS recognizes the important role builders play in contributing to environmental sustainability, environmental protection, and considerate practices during construction. It encourages pro-active engagement with the community and public stakeholders and aims to improve the image and branding of the construction industry.*

Benefits of GGBS

- *Adoption of innovative green practices*
- *Optimization of cost-saving by energy conservation and waste transformation*
- *Alignment and compliance with Government policy in environmental protection*
- *Adoption of friendlier and gracious construction practices*
- *Establishment of good rapport and relationship with neighbors and clients*
- *The safe, healthy and gracious working environment for staff*
- *Better manpower development, engagement, and management*

How Dynamic Safety can help you?

Our consultancy supports the specific needs of the company, to build strength and provide a sustainable solution, based on BCA GGBS assessment criteria.
